DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 29 and 67 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dennison (U.S. Pat. 536266).

Dennison discloses the method for forming a container capacitor, comprising the steps of:

- providing a cup-shaped bottom electrode 42 (cover fig., column 10, lines 35-37);
- providing an insulating layer 32 around and in contact with an exterior surface of the cup-shaped bottom electrode (fig. 4, column 10, lines 35 et seq.);
- etching a portion of the insulating layer from a part of the exterior surface to expose the part of the exterior surface, such that the insulating layer remains in contact with a remaining region of the exterior surface (fig. 5, column 10, lines 15-20);
- depositing a dielectric layer 50 on the part of the exterior surface (cover fig., column 8, lines 51-55); and
- depositing a conductive layer 52 on the dielectric layer.

Dennison does not particularly point out the step of masking a portion of the insulating layer. However, since some masking must be performed to limit the area in which etching as shown in figs. 4-8, use of a mask is inherent in the process, and it

would be obvious to use a mask to limit the etching. Note also that Dennison shows that layer 44 (fig. 4) is photo resist which will function as a mask.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DiLinh Nguyen whose telephone number is (703) 305-6983. The examiner can normally be reached on 8:00AM - 6:00PM (M-F).
